PLASCON is a dense aggregate general purpose concrete building block manufactured in solid units and in an extensive range of strengths. The high density and high strength of **PLASCON** provides high levels of durability and robustness, load bearing capacity and fixability and the sound insulation properties of **PLASCON** are impressive.

PLASCON is manufactured from crushed limestone aggregate, recycled aggregates and pulverised fuel ash. They are plain ended, light buff in colour and available in Open Texture and a paintgrade quality, Close Texture, which accepts direct painting for an attractive smooth and low maintenance finish.

 **RENDERING**
Builders considering the use of proprietary single coat render systems must exercise caution to accurately adhere to the render manufacturers' design and specification guides. Furthermore, during application, strictly adhere to the specific and expansive application instructions, paying particular attention to prevailing weather conditions applied thereto. PLEASE NOTE that traditional rendering applications are not so seasonally and conditionally demanding.
