

Environmental policy statement

As one of the UK's largest independent manufacturer of precast concrete masonry units, precast concrete block paving blocks, (acquisition of materials, manufacture, curing, static plant maintenance and internal transport), including the extraction and processing of heavy clay, the operations of Translift Freight, (road and rail vehicles), Plasmor Ltd is committed to careful management of the environment and the impact of our operations upon it.

As part of our commitment we will:-

- Continually strive to reduce the impacts of our significant aspects, monitor our progress in reducing the impact of our significant aspects with a review of our environmental performance on an annual basis.
- Have Board level focus on energy use by careful measurement of all sites, energy efficiency schemes and projects including the use of alternative energy sources such as renewables, low carbon fuels, and so on.
- Continue to invest heavily in energy conservation Capital projects and low emission/hybrid vehicular technologies.
- Prevent pollution and protect the environment by continually seeking to improve our environmental performance in relation to our determined significant environmental aspects and impacts, operate a policy for recycling of waste materials including re-use of crushed concrete from non-conforming product within our manufacturing processes.
- Comply with all relevant environmental legislation and the compliance obligations of our interested parties.
- Strive to continually improve our environmental performance through monitoring of our progress in achieving our environmental improvements, conducting internal audits and management reviews and maintenance of our ISO14001 certification.
