

Under the Construction Products Directive (89/106/EEC), manufactured construction products need supporting evidence to meet the declared requirements given in that particular European Standard. Reference to this supporting evidence (CE Mark) is found on both the strapping of the product, which has the required printed information covering product type, dimensions, density, strength and web site reference to the DoP (Declaration of Performance). The DoP is a technical document supporting the information supplied by a manufacturer which lists the essential and non essential characteristics of a product.

Plasmor have generated a list of DoP to support the products placed on the market for their intended uses. Any product sold with the document text “seconds” is a non-conforming product that does not meet the criteria set out in the standards.

To retrieve the DoP you can either ask your supplier for a copy, all suppliers of Plasmor or products should be in receipt of a copy, alternatively you can follow the guide as below to retrieve from the Plasmor Web site your own copy. Alternatively please contact the technical department as below and we will supply you with a copy by post or e mail.

How to use the guide

- 1) Identify the product type, by either:
 - a.i. Strapping – on either the vertical or horizontal strapping there is a printed web site followed by a trade name and strength i.e. *Fibolite 3.6n*
 - a.ii. Delivery Ticket on direct to site loads from Plasmor – Each delivery ticket will quote the size and i.e. *Fibolite 3.6n*
 - a.iii. Merchant – If the merchant delivers direct from the yard, this information should be supplied, however look on the strapping / delivery note for the information, if in doubt ask the supplier
- 2) Identify physically if the blocks are of *solid* or *hollow* format
- 3) Go to Plasmor.co.uk/CE, the information above tells us that the product category for the DoP (declaration of performance) – i.e. 003 Fibolite 3.6n/mm²

The list of DoP available is as follows:-

List of DoP	Title of Declaration of Performance (DoP)
001	Stranlite 3.6n / 4.2n / 7.3n / 10.4n Std & PG
002	Stranlite High Strength 17.5n & 22.5n
003	Fibolite 3.6n
004	Fibolite 7.3n
005	Aglite Ultima 4.2n & 7.3n
006	Aglite Ultima 10.4n
007	Plascon 7.3n / 10.4n STD & CT
008	Plascon High Strength 17.5n & 22.5n
009	140 Plascon 7.3n / 10.4n STD & CT HOLLOWES
010	190 Plascon 7.3n / 10.4n STD & CT HOLLOWES
011	215 Plascon 7.3n / 10.4n STD & CT HOLLOWES
012	140 Stranlite 7.3n / 10/4n STD & PG HOLLOWES
013	190 Stranlite 7.3n / 10/4n STD & PG HOLLOWES
014	215 Stranlite 7.3n / 10/4n STD & PG HOLLOWES
015	175mm Airey Block & Cut Corner
019	100mm Architectural Masonry
020	140mm Architectural Masonry Multicore
021	100mm Stranlite JB1 & JB2 Flooring Blocks
022	65mm High Coursing Bricks & Slips
023	140mm High Coursing Bricks & Slips
024	Foundation Blocks

Where no sizes are identified, the DoP covers the range of products within the permitted tolerances.

In the event of any supporting test data or documentation being required, please do not hesitate to contact the technical department at head office in Plasmor, quoting *“information required supporting CE Marking & the claim to a product standard”* and we will send through all relevant data.
