

## Environmental Policy Statement

*As the UK's largest independent concrete block manufacturer, Plasmor is committed to careful management of the impact of our operations on the environment.*

*Our environmental policy is to:-*

- ✔ Comply with all relevant environmental legislation and other requirements where applicable.
- ✔ Continuously seek to improve our performance and prevent pollution in all business areas effecting the environment.
- ✔ Monitor progress and review our environmental performance on an annual basis.
- ✔ Advise and where necessary educate and train our employees in environmental issues and the environmental effects of their activities.
- ✔ Ensure environmental awareness is a key component of our corporate strategy of continuous capital investment in new plant and equipment to ensure use of the best available equipment and the adoption of the latest technology and techniques to reduce the effect of our operations on the environment.
- ✔ Have Board level focus on energy use by careful measurement at all sites and ongoing investment in energy efficiency schemes and projects including the use of alternative fuels.
- ✔ Operate appropriate measures at all sites to minimise the impact of air and noise pollution, emissions from all our industrial processes and to ensure careful management of water resources and drainage.
- ✔ Operate a policy for recycling of waste materials including re-use of crushed concrete waste from manufacturing processes.
- ✔ Engender good relations with the neighbours of our operating sites and react quickly to any environmental issues drawn to our attention.
- ✔ Promote the benefits of sustainable construction using traditional methods in the marketing of our products to the construction industry.
- ✔ **Plasmor is accredited under Environmental Management System - ISO 14001:2004 Certificate No. EMS 536819.**
